Synopsis

2017 - Now Associate Professor, Université Catholique de Louvain, **Belgium**

2014 - 2017 Assistant Professor, Université Catholique de Louvain, **Belgium**

2013 - 2014 Assistant Professor, University of Groningen, **The Netherlands**

2010 - 2012 Visiting Researcher, Carnegie Mellon University, **USA**

2009 - 2013 Chargé de Recherches du FNRS, **Belgium**

2004 - 2008 Ph.D. Fellow, Université Libre de Bruxelles, **Belgium**

1997 - 2003 MSc in CS Eng., Summa cum Laude, University of Palermo, **Italy**

Overview

I am an Associate Professor of Operations Research at [Center for Operations Research and Econometrics \(CORE\)](#) of the [Université Catholique de Louvain](#), Belgium. My research interests mainly concern the following areas:

Optimization	Discrete optimization; polyhedral combinatorics; design and development of algorithms for large scale linear and integer programming; constructive characterizations of the solutions to combinatorial optimization problems (i.e., certificates obtained constructively for checking the existence (or the absence) of specific properties); development of optimization techniques for large scale combinatorial problems arising from practical applications.
Combinatorial & Graph-Theoretic Algorithms	Design and development of algorithms for combinatorial problems on graphs; subgraph and supergraph problems; mathematical results in combinatorics and graph theory; constructive characterizations of the solutions to specific combinatorial optimization problems on graphs.
Design & Analysis of Algorithms	Design and development of optimal and approximate algorithms with performance analysis and approximation guarantees; design of parallel, distributed, and scalabe algorithms for multi/many-core environments; specific topics in data compression and encryption.
Computational Complexity	Completeness; reductions; relation between complexity classes; inapproximability.
Phylogenetics, Tumor Evolution & Medical Bioinformatics	Hierarchical clustering; combinatorics of phylogenetics and its relationships with coding theory and classical combinatorial problems on graphs; design and development of mathematical models and algorithms for phylogeny estimation; consistency analysis; design and development of mathematical models for molecular evolution; design and development of mathematical model and estimation algorithms for genome-wide association studies and tumor profiling via single-cell sequencing.

I currently serves the Faculty Board of the Louvain School of Management as Chair for the Bachelor Curriculum in Management Engineering.

To improve the reading experience, the electronic version of this document is provided with both a table of contents and bookmarks. Hyperlinks are highlighted in [red](#).

Education & Academic Experience

- 02.2018 – 03.2018 Invited Professor of Operations Research at the Department of Management of the University Ca Foscari of Venice, Italy.
- 05.2017 – Present Associate Professor of Operations Research at the Center for Operations Research and Econometrics (CORE) of the Université Catholique de Louvain (UCL).
- 09.2014 – 05.2017 Assistant Professor of Operations Research at the Center for Operations Research and Econometrics (CORE) of the Université Catholique de Louvain (UCL).
- 02.2013 – 08.2014 Assistant Professor of Operations Research at the Department of Operations of the Faculty of Economics and Business of the University of Groningen, The Netherlands.
- 03.2012 – 08.2012 Visiting Researcher at the Department of Biological Sciences of the Carnegie Mellon University, USA. I collaborated with **R. Schwartz** to develop mixed integer programming models to profile tumor progression over time via single-cell sequencing.
- 11.2010 – 04.2011 Visiting Researcher at the Tepper School of Business and at the Department of Biological Sciences of the Carnegie Mellon University, USA. I collaborated with **R. Ravi** and **R. Schwartz** to develop mixed integer programming models for the Steiner tree problem in the hypercube.
- 06.2010 – 06.2010 Visiting researcher at the Department of Computer Science and Biomedical Engineering of Reykjavik University, Iceland. I collaborated with **Bjarni V. Halldórsson** to develop mixed integer programming models for covering and coloring problems on specific classes of interval graphs.
- 05.2010 – 05.2010 Visiting researcher at the Department of Mathematics and Computer Science of the Freie Universität Berlin, Germany. Aim of the visit: increasing knowledge on inverse optimization problems related to metabolic networks at **A. Bockmayr**'s lab.
- 10.2009 – 09.2013 Postdoctoral Researcher of the Belgian National Fund for Scientific Research (FRS-FNRS) affiliated to the Graphs and Mathematical Optimization Unit of the Computer Science Department of the ULB, Belgium.
- 02.2009 – 04.2009 Visiting Researcher at the Department of Statistics and Operations Research of the University of La Laguna, Spain. I collaborated with **J. J. Salazar-González** to develop mixed integer programming models for particular network design problems over a lattice of unrooted binary trees.
- 10.2004 – 10.2008 PhD candidate at the Unit of Graphs and Mathematical Optimization of the Université Libre de Bruxelles (ULB). My focus was on the study of specific network design and covering problems on specific classes of graphs arising from molecular phylogenetics and disease association studies. As a major contribution, I developed the current state-of-the-art MIP model for haplotype estimation under pure parsimony, characterized special classes of edge path incidence matrices of trees, and investigated the fundamental equations that describes unrooted binary trees (phylogenies). During my doctoral studies I spent 3 years at the Institute of Medicine and Molecular Biology of the ULB. I obtained the title of Doctor in Sciences under the supervision of **M. Labbé**.
- The committee for the doctoral defense included: **Michel Gendreau** (Polytechnic of Montreal), **Bernard Fortz** (ULB), **Raffaele Pesenti** (University of Venice), **Guy Latouche** (ULB), and **Patrick Mardulyn** (ULB).
- During my doctoral studies I achieved a number of scientific results published in A07-A08; A15; A18-A20; and R02.
- My doctoral studies have been supported (from 10.2005 to 09.2009) by the Belgian National Fund for Scientific Research (FRS-FNRS) via the prestigious grant “Aspirant FNRS”.
- 09.2003 – 09.2004 Marie Curie Fellow at IRIDIA, ULB. Grant HPRN-CT-1999-00106. Senior scientist in charge: **M. Dorigo**. My focus was on the design, implementation and tuning of metaheuristics for network design and timetabling problems.

09.1997 – 04.2003 Laurea in Computer Science Engineering, Summa cum Laude, University of Palermo, Italy, under the supervision of **R. Pesenti**. Subject of the master thesis: The timetabling problem. During the academic year 2002-2003 I had the possibility to perform extra muros studies at the Polytechnic University of Valencia, Spain, in the context of the Erasmus project.

Grants, Honorary Fellowships & Qualifications

During my doctoral and postdoctoral research activity I obtained the following grants and honorary fellowships:

USA	Visiting grant (9000\$) funded by the Carnegie Mellon University (CMU) via the U.S. National Institutes of Health awards 1R01CA140214 and 1R01AI076318. The grant contributed to cover the visit at the CMU during the period November 2010 – April 2011.
Belgium	Belgian American Educational Foundation (BAEF) Honorary Fellowship 2010-2011 for biomedical engineering researches in the USA. November 2010 – April 2011.
Belgium	Visiting grant (1000€) funded by the European Union COST Action. The grant covered the visit at the AGP lab of the Faculty of Sciences of the University of Geneva, Switzerland, during October 2010.
Belgium	Prize <i>Fonds Brachet</i> (1000€) funded by the Institute of Medicine and Molecular Biology (IBMM) of the ULB. The grant covered the expenses for the meeting <i>Future Directions in Phylogenetic Methods and Models</i> at the Isaac Newton Institute for Mathematical Sciences, Cambridge, United Kingdom, on December 17-21 2007.

I hold the following

Academic Qualifications	2017	Abilitazione Scientifica Nazionale per Professore di Fascia II in Ricerca Operativa (Italian National Scientific Qualification for Associate Professor of Operations Research).
	2012	Maître de Conférence (Assistant Professor) in France for Sections 26 (Applied Mathematics) and 27 (Computer Science).
Memberships & Equivalences	2004	Qualification as Belgian Civil Engineer.
	2003	National Qualification for the Italian Engineering Society.

Research Funds

During my research activity I rose an overall amount of 95000 euros via the following research projects:

2017-2020	Title	COALESCENS, predictive models for precision oncology.
	Funds	To be announced (the fund rising campaign will be carried out throughout 2017-2018).
	Source	Fondation Louvain, Université Catholique de Louvain.
	Role	Principal Investigator.
2017-2019	Title	Optimizing over unrooted binary tree: Bridging the gap between phylogenetics and coding theory
	Funds	74500 euros.
	Source	Université Catholique De Louvain via the “Fonds Speciaux de Recherche 2017”.
	Role	Principal Investigator.
2017-2018	Title	Optimizing over unrooted binary tree.
	Funds	20500 euros.
	Source	The Belgian National Fund for Scientific Research (FRS-FNRS) via the grant “Crédit de Recherche” ref. S/25-MCF/OL J.0026.17.
	Role	Principal Investigator.

Scientific Production

Category	Published and Accepted Articles in International Scientific Journals
Network Design / Phylogenetics	<p>A01. D. Catanzaro, S. E. Shackney, A. A. Schäffer, and R. Schwartz. <i>Classifying the progression of ductal carcinoma from single-cell sampled data: A case study</i>. IEEE/ACM Transactions in Computational Biology and Bioinformatics, 13(4):643–655, 2016. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations.</p> <p>A02. D. Catanzaro, R. Aringhieri, M. Di Summa, and R. Pesenti. <i>A branch-price-and-cut algorithm for the minimum evolution problem</i>. European Journal of Operational Research, Accepted, 2015. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations.</p> <p>A03. D. Catanzaro, R. Ravi, and R. Schwartz. <i>A mixed integer linear programming model to reconstruct phylogenies from single nucleotide polymorphism fragments under the maximum parsimony criterion</i>. BMC Algorithms for Molecular Biology, 8:3, 2013. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations.</p> <p>A04. D. Catanzaro, M. Labbé, R. Pesenti, and J. J. Salazar-González. <i>The balanced minimum evolution problem</i>. INFORMS Journal on Computing, 24(2), 276-294, 2012. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations. This article describes the current state-of-the-art MIP model for the BMEP.</p> <p>A05. R. Aringhieri, D. Catanzaro, and M. Di Summa. <i>Optimal solutions for the balanced minimum evolution problem</i>. Computers and Operations Research, 38(12), 1845–1854, 2011. Contribution: I contributed to conceive the work and to write the article.</p> <p>A06. D. Catanzaro, E. Gourdin, M. Labbé, and F. A. Özsoy. <i>A branch-and-cut algorithm for the partitioning-hub location-routing problem</i>. Computers and Operations Research 38(2), 539–549, 2011. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations.</p> <p>A07. D. Catanzaro, M. Labbé, R. Pesenti, and J. J. Salazar-González. <i>Mathematical models to reconstruct phylogenetic trees under the minimum evolution criterion</i>. Networks 53(2), 126–140, 2009. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations.</p> <p>A08. D. Catanzaro. <i>The minimum evolution problem: Overview and classification</i>. Networks 53(2), 112–125, 2009. Contribution: I conceived the work and wrote the article.</p>
Covering & Coloring / Genome-wide Association Studies	<p>A09. L. Porretta, D. Catanzaro, B. V. Halldórsson, and B. Fortz. <i>Branch&Price Algorithm for the Minimum Cost Clique Cover Problem in Max-Point Tolerance Graphs</i>. 4OR, To appear, 2018.</p> <p>A10. D. Catanzaro and C. Engelbeen. <i>An integer linear programming formulation for the minimum cardinality segmentation problem</i>. Algorithms 2015, 8(4), 999-1020, 2015. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations.</p> <p>A11. D. Catanzaro, M. Labbé, and B. V. Halldórsson. <i>An integer programming formulation of the parsimonious loss of heterozygosity problem</i>. IEEE/ACM Transactions in Computational Biology and Bioinformatics, 10(6), 1391-1402, 2013. Contribution: I contributed to conceive the work and to write the article, implemented the models/algorithms, and performed computations.</p>

- IT29. 13th Mathematical Programming Meeting - 3rd FNRS cycle, Han-sur-Lesse, Belgium, on March 22-23, 2007.
- IT30. CINBIOS (Centre de BioInformatique et BioModelisation) meeting, Department of Computer Science, Université Libre de Bruxelles, Belgium, on September 29, 2006.
- IT31. Computer Engineering and Networks Laboratory (TIK), E.T.H. Zurich, Switzerland, on October 7, 2004.
- IT32. Metaheuristics Network Final Meeting, Edinburgh, UK, on June 27-29, 2004.

Scientific Collaborations (Partial list)

- Academic Collaborations
- Raffaele Pesenti**, Department of Applied Mathematics, University 'Ca Foscari of Venice, Italy. R. Pesenti was my master thesis supervisor and is one of my most active collaborators. Our joined efforts gave rise to the articles A02; A04; A07; A17; A18; A19; R02;
- R. Schwartz**, Department of Biological Sciences and Department of Computational Biology of Carnegie Mellon University, USA. Our joined efforts gave rise to A03 and S01.
- R. Ravi**, Tepper School of Business of Carnegie Mellon University, USA. Our joined efforts gave rise to A03.
- Bjarni V. Halldórsson**, Department of Computer Science and Biomedical Engineering of Reykjavik University, Iceland. Our joined efforts gave rise to A011, A22 and S01.
- Magnur Mar Halldórsson**, School of Science and Engineering, Reykjavik University, Iceland. Our joined efforts gave rise to A22.

Luis Eduardo Neves Gouveia, Department of Statistics and Operations Research, University of Lisbon, Portugal. Our joined efforts gave rise to the article A21;

Laurence Wolsey, Center for Operations Research and Econometrics (CORE), Catholic University of Louvain, Belgium. Collaboration in progress;

Dr. Marco di Summa, Department of Applied Mathematics, University of Padua, Italy. Our joined efforts gave rise to the articles A05 and A02.

J. J. Salazar-González, Department of Statistics and Operations Research of the University of La Laguna, Spain. Our joined efforts gave rise to A04 and A07.

Alejandro A. Schäffer, Computational Biology Branch of NCBI, NIH, Bethesda, MD, USA. Our joined efforts gave rise to the articles S01;

Dr. Roberto Aringhieri, Department of Computer Science, University of Turin, Italy. Our joined efforts gave rise to the articles A02 and A05.

Editorial and Organizational Activities

I was among the organizers of the 26th Annual Conference of the Belgian Operations Research Society (ORBEL 2012). Moreover, I served and/or serve as a referee for numerous international journals and conferences, including (the list may be not updated):

OR Journals	Discrete Applied Mathematics, INFORMS Journal on Computing, Networks, Mathematical Reviews, Journal of Discrete Optimization, Computers and Operations Research, European Journal of Operational Research, 4OR, Journal of Genetic Programming and Evolvable Machines, International Transactions in Operational Research, Information Processing Letters.
Bioinformatics Journals	Bioinformatics, PLoS One, IEEE/ACM Transactions on Computational Biology and Bioinformatics, Journal of Computational Biology, Genetics and Molecular Biology, Evolutionary Bioinformatics, Tissue Antigens.
International Conferences	4th International Workshop on Hybrid Metaheuristics (HM07) 2007, International Network Optimization Conference (INOC) 2009, 25th European Workshop on Computational Geometry (ECG09) 2009, European Conference on Computational Biology 2010, Learning and Intelligent Optimization Conference (LION6) 2012, International Conference on Research in Computational Molecular Biology (RECOMB 2012), Workshop on Algorithms for Bioinformatics (WABI 2012), The International Symposium on Bioinformatics Research and Applications (ISBRA 2012), 3rd International Symposium on Combinatorial Optimization (ISCO 2014).
Institutions	The Belgian national fund for scientific research and the Romanian national research council.

Teaching Experience

I am (or I have been) in charge for the following bachelor and master courses:

Date	Label	Synopsis
2017-Now	UCL-TC01	Optimization . Louvain School of Management (LSM), UCL , Belgium. ETCS: 5. Theory: 30h; Exercises: 15h. Level: Bachelor. Language: English. Description: Part I (Continuous Optimization): Continuity, differentiability in n dimension, conditions for differentiability, necessary conditions for optimality, convex sets, convex functions, convex optimization problems, Lagrangian duality, gradient descent algorithms, rudiments of smooth and non-smooth nonlinear optimization; Part II (Discrete Optimization): Formulations; optimality, relaxation, and bounds; relationships between relaxations; efficient optimization property; total unimodularity and efficient convex hull property; strong duality property; efficient separation property; matchings and assignments; introduction to branch and bound.

- 2014-Now UCL-TC02 **Quantitative Decision Making**. Louvain School of Management (LSM), **UCL**, Belgium. ETCS: 5. Theory: 30h; Exercises: 0h. Level: Master. Language: English. Description: integer linear systems: projection and inverse projection; projection: Benders decomposition; inverse projection: dantzig-wolfe decomposition; recall of Lagrangian duality; cutting plane algorithms; strong valid inequalities; branch-and-cut; capital budgeting; portfolio optimization; Internet combinatorial auctions; introduction to integer optimization methods for machine learning.
- UCL-TC03 **Supply Chain Management**. Louvain School of Management (LSM), **UCL**, Belgium. ETCS: 5. Theory: 30h; Exercises: 0h. Level: Master. Language: English/French. Description: Part I (Foundation of strategic supply chain network design): value of supply chain network modeling, intuition building with center of gravity models, locating facilities using a distance-based approach, alternative service levels and sensitivity analysis, adding capacity to the model, adding costs to two echelon supply chains, adding outbound transportation to the model, introducing facility fixed and variable costs, baseline and optimal baselines; Part II (advanced modeling including the extension to multiple echelons): three echelon supply chain modeling, adding multiple products and multi-site production sourcing, multi-objective optimization, how to get industrial strength results, data aggregation in network design, case studies.
- UCL-TC04 **Quantitative Project and Project Management**. Louvain School of Management (LSM), **UCL**, Belgium. ETCS: 5. Theory: 15h; Exercises: 0h. Level: Master. Language: French. Description: The course focus on the resolution, via optimization techniques, of industrial problems involving, among others, transportation, location, planning, routing, and network design features. The introductory part of the course consists of a recall of mixed integer linear programming, including modeling with binary variables, logical conditions, simple implications, generalized implications, products of binary variables, dichotomies, counting, general integer, partial integers, semi-continuous variables, products of binary variables and real variables, fundamental theory of the real case studied, prototyping with Fico Xpress IVE, basics of Fico Xpress Mosel, advanced aspects of Fico Xpress Mosel.
- UCL-TC05 **Programming Project (Algorithms and Data Structures)**. Louvain School of Management (LSM), **UCL**, Belgium. ETCS: 5. Theory: 30h; Exercises: 15h. Level: Master. Language: English/French. Description: Fundamental data structures, introduction to graph theory, recursion, exploring and searching on graphs, dynamic programming part I (well solved optimization problems in management science: spanning trees), dynamic programming part II (well solved optimization problems in management science: shortest paths), dynamic programming part III (well solved optimization problems in management science: network flows), dynamic programming part IV (well solved optimization problems in management science: matching), hard optimization problems in management science part I (finding the optimum via enumeration), hard optimization problems in management science part II (heuristics, local searches and metaheuristics).
- 2014-2015 ULB-TC01 **Algorithms 2 (INFO-F-203)**. Computer Science Department, **Université Libre de Bruxelles**, Belgium. ETCS: 5. Theory: 24h; Exercises: 24h. Level: Bachelor. Language: French. Description: The course provides an introduction to hash tables, binary search trees, red-black trees, graphs, search for strongly connected components and cycles, topological sorting, minimum spanning trees, shortest path algorithms, general algorithms on graphs.
- 2013-2014 RUG-TC01 **Operations Research 2 (Foundation of Logistics System Engineering)**. Faculty of Economics and Business, **University of Groningen**, The Netherlands. ETCS: 5. Theory: 40h; Exercises: 40h. Level: Bachelor. Language: English. Description: The course deals with optimization aspects related to transportation, location, planning, routing, network optimization, and (introduction to) heuristics and integer programming.
- RUG-TC02 **Combinatorial Optimization**. Faculty of Economics and Business, **University of Groningen**, The Netherlands. ETCS: 5. Theory: 40h; Exercises: 40h. Level: Master. Language: English. Description: The course covers all of the topics discussed in the book L. Wolsey. *Integer Programming*, Wiley Interscience, NY, 1998.

- RUG-TC03 **Capita Selecta EORAS (Advanced Linear and Integer Optimization)**. Faculty of Economics and Business, **University of Groningen**, The Netherlands. ETCS: 5. Theory: 40h; Exercises: 40h. Level: Master. Language: English. Description: The course deals with projective and decomposition approaches to large scale linear and integer programming, with special attention to Bender's decomposition and Dantzig-Wolfe decomposition.
- 2012-2013 RUG-TC04 **Supply Network Analysis**. Faculty of Economics and Business, **University of Groningen**, The Netherlands. ETCS: 5. Theory: 40h; Exercises: 40h. Level: Master. Language: English. Description: The course covers advanced aspects of combinatorial optimization and covers the following topics: Network Matrices, Total Unimodularity, Network Design; Polyhedral Combinatorics, Strengthening Valid Inequalities, Branch-and-Price.
- 2011-2012 ULB-TC02 **Algorithms 2 (INFO-F-203)**. Computer Science Department, **Université Libre de Bruxelles**, Belgium. ETCS: 5. Theory: 24h; Exercises: 24h. Level: Bachelor. Language: French. Description: The course provides an introduction to hash tables, binary search trees, red-black trees, graphs, search for strongly connected components and cycles, topological sorting, minimum spanning trees, shortest path algorithms, general algorithms on graphs.

Teaching activities (exercise sessions) during the post-doctoral activities:

- 2011-2013 ULB-EX01 **Combinatorial Optimization (INFO-F-424)**. Computer Science Department, **Université Libre de Bruxelles**, Belgium. ETCS: 5. Theory: 24h; Exercises: 12h. Level: Master. Language: French. Description: The course covers all of the topics discussed in the book L. Wolsey. *Integer Programming*, Wiley Interscience, NY, 1998.
- 2011-2012 ULB-EX02 **Continuous Optimization (INFO-F-524)**. Place: Computer Science Department, **Université Libre de Bruxelles**, Belgium. ETCS: 5. Theory: 24h; Exercises: 12h. Level: Bachelor. Language: French. Description: The course covers linear programming, constrained and unconstrained optimization, Lagrangian relaxation in combinatorial optimization; column generation methods, the interior point method.
- 2009-2011 ULB-EX03 **Foundations of Computer Science (INFO-F-206)**. Computer Science Department, **Université Libre de Bruxelles**, Belgium. ETCS: 10. Theory: 36h; Exercises: 48h; Final Project: 12h. Level: Bachelor. Language: French. Description: The course introduces to computer science and deals with the fundamental algorithms on arrays and lists, recursion, and sorting.

Supervision Activity

Supervision of doctoral students:

- Belgium PD01 Martin Frohn. CORE, Université Catholique de Louvain, Belgium. Doctoral studies started in 2017.

I have been member of the following doctoral defense committees:

- Belgium BE01 Luciano Porretta. *Models and methods in genome-wide association studies*. Computer Science Department, Université Libre de Bruxelles, January 2018.
- BE02 Cyrille Dejemeppe. *Abstractions and algorithms for scheduling applications*. Institute of Information and Communication Technologies, Electronics and Applied Mathematics, Louvain School of Engineering, Université Catholique de Louvain, June 2016.

Italy IT01 Veronica Dal Sasso. *Branch-and-price approaches for pure-parsimony haplotyping*.
Department of Mathematics, University of Padua, Italy, December 2016.

I have supervised the theses of numerous master students from the Université Libre de Bruxelles (Belgium), the Université de Mons-Hainaut (Belgium), the Università degli studi dell'Aquila (Italy), the University of Padua (Italy), the University of Groningen (The Netherlands), the University of Palermo (Italy), the Polytechnic University of Catalunya (Spain), and the Université Catholique de Louvain (Belgium).

Spoken Languages

Italian	Mother tongue;
English	Fluent;
Spanish	Fluent;
French	Fluent;
Dutch	Beginner (Level A1.1 obtained at the Vrije Universiteit Brussel on 06/2010).

Personal Information

Born in:	Palermo, Italy, on November 1 st 1978
Age:	39 years old
Nationality:	Italian

Curriculum Vitae updated to **May, 2018**.
